

HYAZ™ Inkjet Media

Window Transparency Film

Printing and Application Instructions

- 1) Copy/Print on the coated side of the media using a compatible Inkjet Printer.
- 2) To prevent a paper jam, make sure the vinyl is not bent or warped or corners folded BEFORE loading. Loading by hand ONE SHEET at the time (pressing FF/Ready) is a way to make sure it loads correctly.
- 3) When gluing this PET media to any substrate, clean the surface and remove residual grease, soot or dust.
- 4) It is not recommended (on larger labels like 11" X 17") to remove all the back paper before installing. It's better to remove the paper from a small area at one end first such as a 1/2" vertical strip at the left hand or right hand edge.
- 5) Line up your label. When the position looks correct, let the label make contact with the surface on the edge where you removed the back paper.

| | |
|------------------|------------------------|
| Item # | AWT8511 |
| Media | Self Adhesive PET film |
| Media Type | Inkjet |
| Color | Clear (Transparent) |
| Printers | Most Desk Top |
| Type of Adhesive | Removable |

Note:
Air bubbles will only become visible if you try to glue this label on to the substrate by rubbing on it like it was a label trying to "glue" it to the surface. Do NOT do this. Simply "put" the label on the substrate and that's it. If you are looking for permanent label to "Glue on" to the substrate then use our Vinyl Film.

NOTE: This media is NOT intended for outdoor use. If used where humidity is high or moisture may collect on the substrate use clear spray our use one of our self adhesive inkjet laminate or similar product.
